Frost Fighter[®] Defroster Tabs and Connectors

Factory Defroster Replacement Parts

Replacement defroster tabs and connectors

Missing defroster tabs, clips or connectors?

Rear window defrosters have at least two metal tabs located along the edge of the defroster. These tabs connect the defroster electrically to the vehicle's power and ground.

When a tab comes off the defroster stops working and the tabs can be lost or damaged. Frost Fighter Uni-Clip defroster tabs are factory replacements for damaged or missing tabs.

New tabs for a perfect match

Uni-Clip tabs are factory replacements which work with all vehicle defrosters and connectors including Ford, Honda, Toyota, Nissan, Subaru, GM, Chrysler and many others.

How to choose?

Typically only one tab is damaged so choose the tab that most closely matches the vehicles existing tab.

How to re-attach the tab to the defroster

Reattaching the tab to the defroster is EASY!

Silver makes the difference

Frost Fighter Tab Bonding Kits use a highly conductive silver adhesive re-attach the Uni-Clip to the defroster.

The 2000 Tab Bonding adhesive makes the electrical and structural connection in one simple operation needed for high amperage defroster repairs.

Uni-Con Defroster Connectors

Defroster connectors attach to the defroster wire and join with the tab to connect the defroster electrically. Uni-Con Connectors replace lost or damaged defroster connectors.

Defroster connector replacements

Uni-Con Connectors crimp on the existing defroster wires in the vehicle. No special tools are needed. The attractive cover snaps over the connector for a factory look.

Uni-Con Connectors are universal and fit all makes and models.

See our full line of Frost Fighter rear window defroster repair solutions including the Clear View II defroster replacements.
